

SL7222 Low Voltage Power Distribution System

Superlight SL7222 is a convenient system for installing multiple low voltage fittings or strips. The power connectors allow low voltage such 12VDC or 24VDC power to be distributed along the length of the power rail and corresponding LED strips or fittings can be connected neatly at any point along the track rail. The system eliminates untidy wiring and helps delivers a professional installation.

SPECIFICATIONS

Input Voltage:	8-30VDC
Power Rail Available Lengths:	2mtr
Power Rail Profile Dimensions:	20x6mm
Colour/Finish:	Matt Black
Fixing Accessories:	Mounting Clips
Max Current Rating:	10A
Power Connector Current Ratings:	10A / 20A Versions
IP Protection Rating:	IP20 Indoor Use Only

TYPICAL APPLICATIONS

Joinery & display case lighting, Shelf and retail display lighting, Installations where multiple connections are necessary, Projects demanding tidy cable management, Professional installations of low voltage LED lighting products.

CUSTOMIZATION OPTIONS

Power rail system available in white or silver by special request
Customised lengths available by request
Superlight can design and supply a tailored solution for any project

ORDERING INFORMATION

- SL7222-20 Low Volt Power Rail System - Power Distribution Rail 2mtr Black
- SL7222-22 Low Volt Power Rail System - Power Rail Connector 10A with 500mm Tail
- SL7222-24 Low Volt Power Rail System - Power Rail Connector 20A with 500mm Tail
- SL7222-26 Low Volt Power Rail System - Inline Joiner
- SL7222-28 Low Volt Power Rail System - End Cap
- SL7222-29 Low Volt Power Rail System - Mounting Clip
