

SL5055 DMX INTERFACE

Superlight SL5055 is a master DMX512 control system which can turn any computer into a powerful lighting control console. Superlight Super-DMX lighting control software allows lighting shows to be authored and controlled and is suitable for DMX installations of any size.

The Superlight SL5055 control system works best with Superlight DMX512 enabled devices such as the Superlight SL5059 DMX LED decoder.
